

Lets Talk ...

If elevating energy efficiency and reducing CO₂ emissions with scientific precision, align with your business and sustainability goals.

What we offer

At HRL, we offer specialised energy efficiency solutions. We conduct formal energy audits to the standard series AS/NZS 3598, Energy audits. Our comprehensive services include benchmarking energy use, identifying savings opportunities, providing emission reduction solutions and implementing actions for energy-intensive industrial facilities. Leveraging our state-of-the-art laboratories, advanced modelling tools, and extensive technical support, we offer turn-key solutions. From combustion optimisation to waste recovery, our in-house capabilities assist our clients to reduce costs and improve operational efficiency.

Energy Audit Services

Industry Challenges

Australian manufacturing businesses grapple with escalating costs of natural gas, electricity, and fuels, creating challenges for sustainable profitability. Beyond financial pressures, complexities in energy-intensive processes, evolving industry standards, and dynamic market demands add further layers of complexity. HRL understands these multifaceted challenges and tailors our solutions for thriving in a competitive landscape.

Our Expert Team:

At HRL, we bring over 15 years of diverse expertise thorough R&D and practical project experiences, we excel in process modelling, energy efficiency audits, and ensuring safety across diverse industrial facilities, aligning with our commitment to precision and innovation.
